ESD Table Mats

InterWorld® ESD Table Mat

InterWorld® ESD Table Mat is a durable dual-layer static control mat designed for electronics assembly, repair, and ESD-protected workstations. Featuring a static-dissipative surface and a conductive base layer, it provides reliable grounding and fast static decay for sensitive components. The mat offers excellent abrasion resistance, chemical stability, and long service life while maintaining flexibility for easy installation. Ideal for laboratories, factories, maintenance benches, and any ESD-critical work environment requiring clean, safe, and efficient electrostatic protection.

Features

- Excellent resistance to oil, grease and most common solvent.
- It has light weight
- Easy to cut

Application

- Electronic industry cleanroom

General Properties

Resistivity of Surface Layer	$10^7 - 10^9 \Omega$
Resistivity of Bottom Layer	$10^3 - 10^5 \Omega$
Bulk Resistivity	$10^5 - 10^8 \Omega$
Abrasiveness Loss	$< 0.02 \text{g/cm}^2$
Time for Static Dissipation	$< 0.1 \text{s}$

Available Width:	60cm / 80cm / 100cm / 120cm
Length:	10m
Color	Glossy Green/Black ..etc
Thickness	2.0 mm
